## Training and Development Satisfaction

Carers across Queensland underwent an assessment process before a recommendation of approval is granted before commencing their role. During and after the assessment process, carers are required to complete training to develop their understanding of the child safety system, child development and trauma-informed training.

Queensland carers are also provided information on the roles and responsibilities of stakeholders involved (Child Safety and their agency), as well as their policies and procedures. Participants of the survey provided feedback on the delivery of information by providing a satisfaction rate around training and information. Kinship carers had a separate set of statements as this was tailored to the kinship care process.
